Project Overview

Pet Rescue’s mission is to help pet owners keep their animals safe. When a dog or cat runs away, Pet Rescue helps distribute information to the community, and runs a search committee to help find the lost animals and return them safely to their owners. Pet Rescue wants to develop an app that will provide pet owners with a tool to help them find lost pets.

The “Where’s Fluffy?” app will allow people to create a lost pet profile, post to a virtual bulletin board, find lost pets in their area, and report any found pets.

System Information

Platforms:

Native app developed for Android 4.0+ & 5.0+.

Development Language:

Android: Java

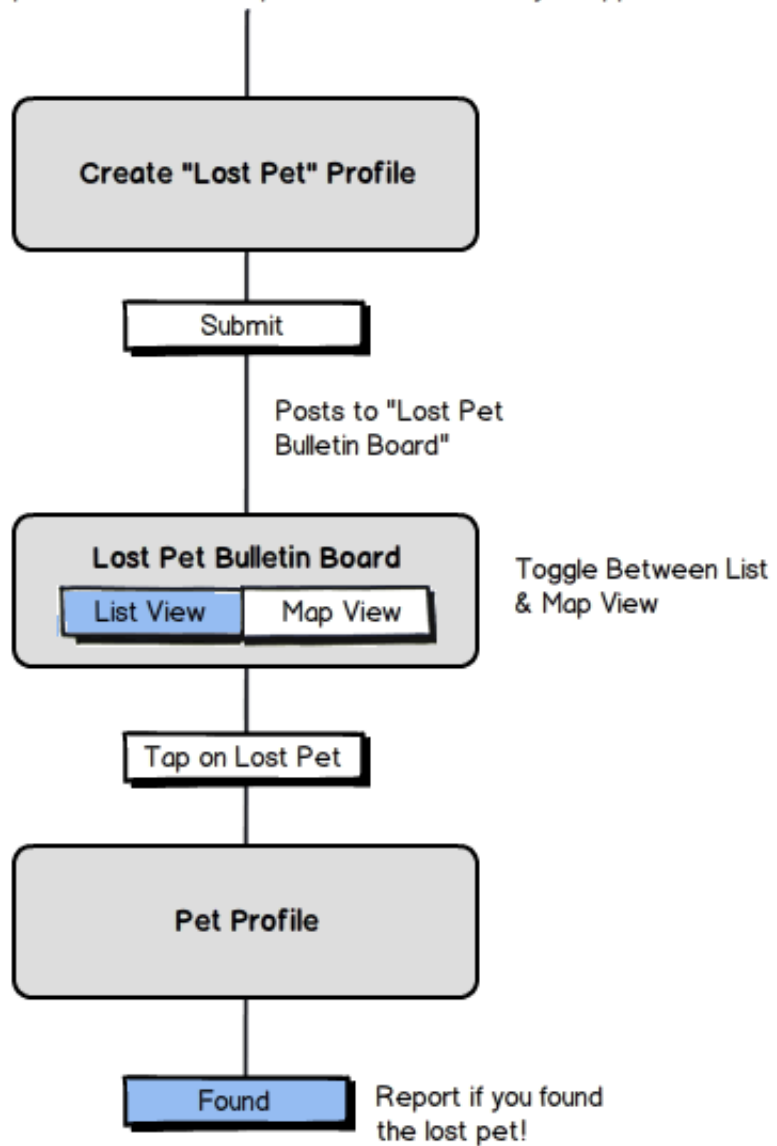

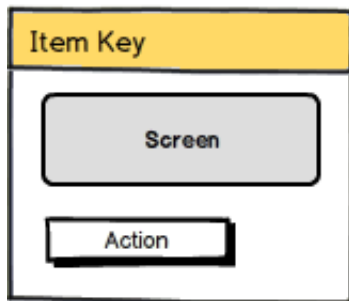

Workflow

This is the user journey for the “Where’s Fluffy?” app from reporting a pet lost to reporting a pet found. There are four key steps:

1. Create a Lost Pet Profile
2. View the Lost Pet Bulletin Board (list or map view)
3. Select a lost pet and go to its Pet Profile
4. Report a pet found

I lost my pet! Download and open the "Where's Fluffy?" App.

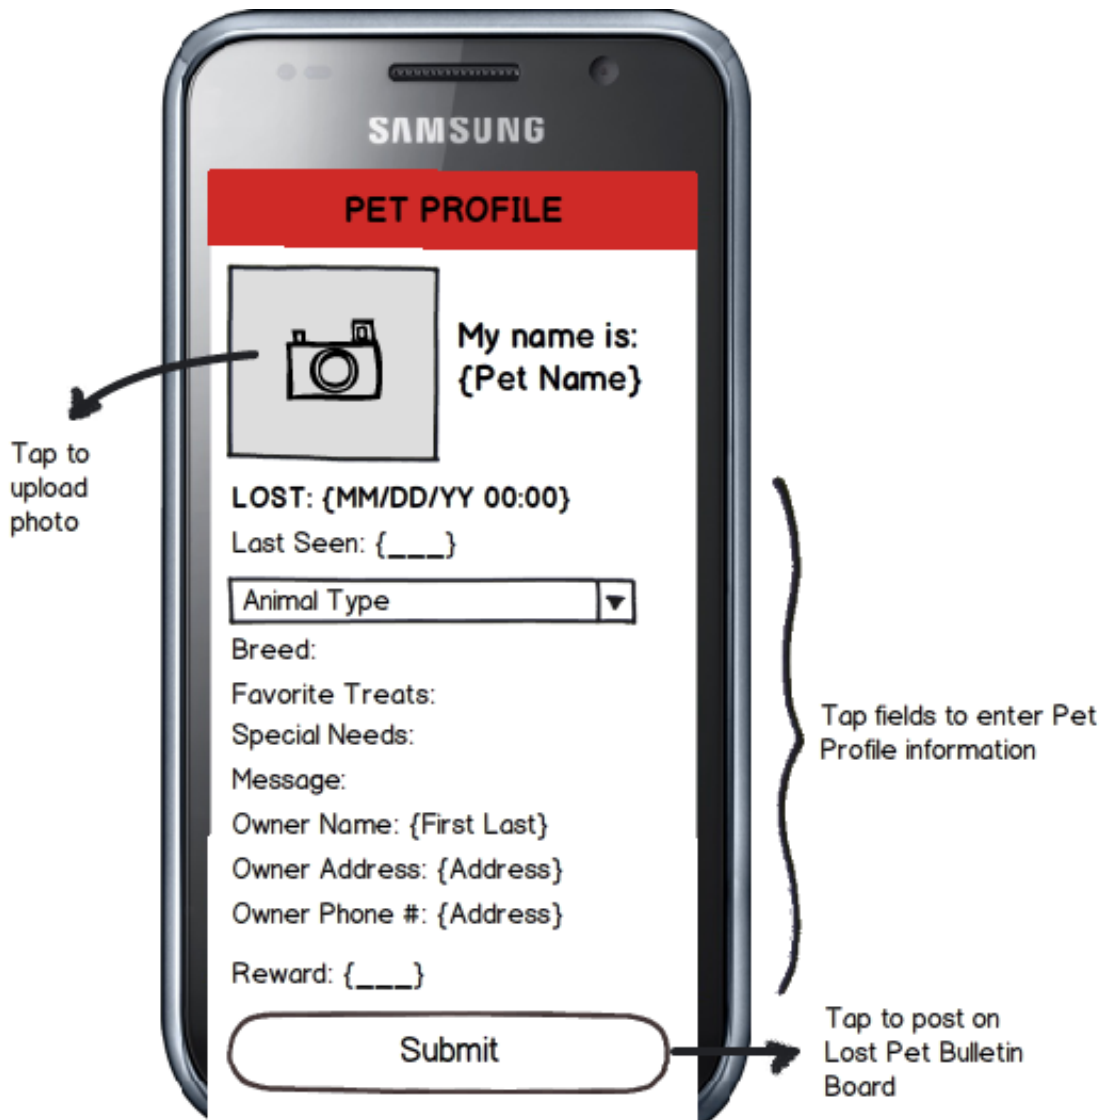

Screen-by-Screen Specification

New Pet Profile Screen

This screen allows Lost Pet Owners to create a pet profile with a detailed description of their missing animal. Users can upload a photo, describe their pet, and submit the profile to the Lost Pet Bulletin Board.

Lost Pet Bulletin Board

This section displays a listing of all lost pets in your local area. Users can set their current location to view lost pets nearby in List or Map View.

List View
