

Expert Space™

Expert Space is the powerful digital curriculum featuring accessible, leveled content-area information, and interactive, personalized learning tools to transform the way all students access and deepen content-area knowledge, plan and complete projects and assignments, and develop 21st century information literacy skills.

Accessible, Leveled Content

Organized around the most commonly taught, studied, and researched topics, [Expert Space](#) provides the best starting point for learning and exploration in science, social studies, current events, and more.

- 100 content bundles and 120,000 articles cover 100% of essential skills in science and social studies.
- Anchor videos, leveled text, read-alouds, and Spanish translations make content accessible to all students.

Interactive, Personalized Learning Tools

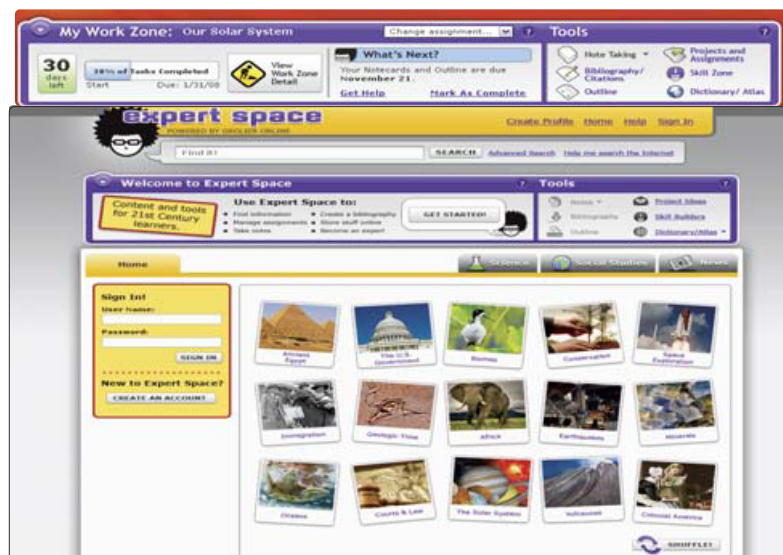

Harnessing the power of technology, [Expert Space](#) helps every student plan and complete assignments, while building 21st century information literacy skills.

- Assignment planning wizard and calendar helps students plan projects and stay on task.
- Online note taker enables students to synthesize and organize information.
- Digital locker allows students to save and manage content online.

Dynamic, Correlated Teaching Resources

[Expert Space](#) features an extensive range of teaching resources that support content-area instruction, as well as the development of key information literacy skills.

- Over 100 lesson plans and 300 project ideas support instruction in science, social studies, and information literacy skills.
