Step Into a Science, Technology, Engineering, or Math (STEM) Career

Challenge

1. Can you picture yourself as an engineer or a wildlife biologist?

2. Using the **Cartoon Maker app** on your tablet, create a cartoon of yourself in any STEM career working on a community project.

3. Check out the following examples: as an engineer, will you build a new pedestrian bridge over a busy highway? Or as a wildlife biologist, will you be working on a project that will help wildlife coexist with people in a suburban community?

Career Connection

People in STEM careers work to improve communities—many times these communities are their own! To learn more about all of the great STEM careers and their tasks and responsibilities, click here to check out the STEM Career Flip Book.
